

VEROQUENCE

SUPPLY GROUP LLC | COMPANY CAPABILITY STATEMENT

What we do

Veroquence coordinates buyer requirements, supplier sourcing, subcontracted delivery, and documented pricing for public sector and commercial procurement. We seek the right fulfillment partners for each requirement and build a clear commercial picture before proposing a bid.

Core capabilities

- Product sourcing and quote coordination across business supplies and equipment.
- Courier, delivery, transportation, and related logistics through qualified partners.
- Staffing and workforce fulfillment through appropriately qualified staffing partners, subject to the solicitation's licensing, insurance, payroll, and labor requirements.
- Software and technology sourcing through suitable publisher, reseller, or implementation partners.
- Supplier comparison, cost verification, fulfillment planning, and response preparation.

Staffing market focus

561320 — Temporary Help Services

561311 — Employment Placement Agencies

These are target opportunity codes. Inclusion here does not assert that they are currently listed in Veroquence's external SAM.gov registration. Scope, location, and partner qualifications are reviewed for each opportunity.

How a project moves

Buyer requirement → supplier or staffing partner match → verified cost and delivery plan → priced offer → owner approval → authorized submission. Requests for information (RFIs) are reviewed as market research and answered according to their instructions; they are not treated as purchase awards.

Finance partner fit

For eligible orders, Veroquence can present the buyer documentation, supplier cost, expected payment terms, and fulfillment plan for independent consideration by a financing partner. Financing is subject to lender underwriting and transaction terms.
